VAIBHAV CHOUBISA

Vadodara, India — Vaibhavchoubisa77@gmail.com — +91 9571477013 — Portfolio

PROFESSIONAL SUMMARY

Results-driven React Native and React.js Developer with hands-on experience building scalable cross-platform mobile applications and responsive web interfaces. Proficient in end-to-end mobile app development including real-time features, API integration, booking systems, and role-based user flows. Adept at writing clean, reusable component-based code with a strong focus on performance, UI/UX quality, and ATS-aligned engineering practices. Seeking a full-time role to contribute to high-impact product teams.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Python, HTML5, CSS3
- **Frameworks & Libraries:** React Native, React.js, Next.js, Tailwind CSS, Bootstrap
- **Mobile Development:** Cross-Platform Apps, Navigation (React Navigation), Push Notifications, Role-Based Flows, Real-Time Chat, Geolocation, Booking Systems
- **Web & API:** RESTful API Integration, Dynamic Data Rendering, Component Architecture, Responsive Design
- **Tools & Platforms:** Git, GitHub, VS Code, Android Studio, Debugging, Postman
- **Backend:** Node.js, Express.js
- **Database:** MongoDB
- **Other:** Performance Optimization, UI/UX Best Practices, Agile/Collaborative Development

PROFESSIONAL EXPERIENCE

React Native Developer — I2R Aug 2025 – Present

- Architected and delivered cross-platform mobile applications using React Native, targeting Android devices with production-grade performance.
- Engineered a full-featured Beauty & Beautician On-Demand application with dual user roles (customer and beautician), real-time booking management, and location-based service discovery.
- Implemented real-time in-app chat between customers and beauticians, triggered post-booking-confirmation using event-driven state management.
- Built a dynamic beautician dashboard featuring earnings tracking, booking accept/reject workflows, service listing management, and profile customization.
- Developed a location-aware beautician discovery module enabling customers to browse and filter beauticians by service area with profile viewing capability.
- Integrated RESTful APIs for product listings, food menus, booking flows, and dynamic user data across multiple application modules.
- Implemented navigation flows, cart management systems, and order tracking interfaces using React Navigation.
- Optimized component re-rendering and improved mobile performance, resulting in a significantly smoother user experience.
- Collaborated in a team environment using Git for version control, branch management, and code reviews.

Frontend Developer Intern — Voldebug Dec 2024 – Apr 2025

- Developed and shipped responsive frontend interfaces using React.js and Next.js for production web applications.
- Integrated third-party and internal REST APIs with dynamic data rendering, improving overall system efficiency and responsiveness.
- Built a reusable component library following atomic design principles, reducing future development time across the project.
- Collaborated closely with backend engineers to establish seamless API contracts and ensure consistent data flow between client and server.
- Participated in code reviews and agile sprints, contributing to improved code quality and team velocity.

Cyber Security Intern — IBM (AICTE) Jan 2025 – Feb 2025

- Implemented encryption and decryption algorithms to simulate secure communication channels.
- Built a steganography-based application for embedding hidden messages within digital media files.
- Gained practical exposure to cybersecurity fundamentals including firewall configuration, threat modeling, and system hardening practices.

PROJECTS

Beauty & Beautician On-Demand App — React Native

- Developed a full-stack mobile application enabling customers to book beauticians for home-based services including makeup, pedicure, and hair styling.
- Implemented a dual-mode toggle allowing any registered user to switch between customer and beautician roles dynamically within the same application.
- Built a location-based beautician discovery system enabling customers to search, filter, and browse beautician profiles by geographic area.
- Designed and integrated an in-app real-time chat module activated upon booking confirmation, facilitating seamless communication between both parties.
- Created a comprehensive beautician dashboard with earnings analytics, active booking management (accept/reject), and service portfolio management.

- Integrated RESTful APIs for user authentication, service listings, booking lifecycle, and profile management across both user roles.

React Native Grocery + Food Delivery App

- Designed and developed a hybrid mobile application combining grocery shopping and food ordering into a unified React Native experience.
- Implemented category-based product and menu browsing, a cart management system, and real-time UI state updates.
- Integrated REST APIs for dynamic menu and inventory data, ensuring accurate, up-to-date product information for end users.
- Built optimized, responsive mobile UI components targeting Android devices with smooth scrolling and efficient list rendering.

E-Commerce Web Application — React.js

- Built a full-featured e-commerce platform with product catalog browsing, dynamic filtering, and a complete cart-to-checkout workflow.
- Integrated product and payment APIs, and applied React performance optimization techniques (lazy loading, memoization) for faster page loads.
- Developed a scalable component library using React.js and Tailwind CSS, enabling consistent UI across all pages.

Real Estate Platform — React.js

- Developed a fully responsive real estate listing platform using React.js and Tailwind CSS, featuring property browsing and detailed listing views.
- Implemented interactive UI sections, property inquiry contact forms, and smooth scroll animations to enhance user engagement.

Movie Discovery App — React.js

- Integrated public movie APIs (TMDB) to power a dynamic movie browsing and search application with real-time data rendering.
- Implemented a user favorites feature with local state persistence and optimized component rendering for improved performance.

EDUCATION

Parul University, Vadodara 2022 – Present
BCA + MCA (Integrated 5-Year Program)
CGPA: 7.26 — Latest SGPA: 8.32

Saint Patrick Sr. Sec. School, Udaipur
Senior Secondary — Commerce Stream — 75.46%

CERTIFICATIONS

- Cyber Security Certification — IBM SkillsBuild (2025)
- Python for Beginners Certification — Infosys Springboard (2024)
- C Programming Certification — Great Learning (2024)
- Big Data & Hadoop Fundamentals Certification (2023)
